

Just paste the below code.

```
var trainingManagementUtils = Class.create();

trainingManagementUtils.prototype = {

  initialize: function() {

  },

  getAssignmentGroup : function(requiredLocation){

    var assignmentGroup = ' ';

    grTOS.addQuery('location', requiredInLocation);

    grTOS.query();

    while(grTOS.next()){

      assignmentGroup = grTOS.assignment_group;

    }

    return assignmentGroup;

  },

  type: 'trainingManagementUtils'

};
```
