

Just paste the below code:

```
function onChange(control, oldValue, newValue, isLoading, isTemplate) {  
  
    if (isLoading || newValue === '') {  
  
        return;  
  
    }  
  
    //Type appropriate comment here, and begin script below  
  
    var regex = new RegExp("[!@#$%^&*!]");  
  
    var trainingName = newValue;  
  
        var result = regex.test(trainingName);  
  
        if(result){  
  
            alert("Damn, no special characters are allowed.");  
  
        }  
  
    }  
}
```
